

SPIR STAR[®]

Tough Times Demand Tough Hoses

Count on our cost effective solutions

Blast-Pro[®]

- Allows faster cleaning rates and reduces job time.
- Increases operating pressure at the nozzle for improved efficiency.

Duralife[®] Flex

- Lasts 40% longer than standard flex lances.
- Decreases downtime and replacement costs.

Silver Mongoose[®]

- Built for extreme service and rough handling.
- Super urethane cover lasts three times longer than standard rubber hose.

Maximus[®]

- Larger ID increases flow and decreases costly pressure drop.
- Reduces wear and fatigue on your entire pump system.

Proven products that keep your profits up and costs down!

www.spirstar.com

SPIR STAR has continually designed and developed the products needed for today's tough high pressure applications. Blast-Pro[®], Duralife[®] Flex, Maximus[®], and Silver Mongoose[®] are the **SPIR STAR** hard-hitting line of Ultra High Pressure hoses regularly used in today's water blasting industry. With our strong commitment to "Outstanding Quality . . . Outstanding Service"[™] and innovation, **SPIR STAR** continues to be the leader in Ultra High Pressure hose, fittings and adapters.

Blast-Pro[®]

SPIR STAR's Blast-Pro[®] flex lances increase cleaning efficiency and reduce lance time by providing you with a larger inner diameter hose with a smaller outer diameter and shorter end fitting. The Blast-Pro[®] flex lance has a sleeve length 50% shorter than conventional flex lances and increases the maximum outer diameter of the flex lance by only four hundredths of an inch. With the Blast-Pro[®] flex lance you can clean smaller tubes and pipes with a larger inner diameter hose and make quick work of tight bends and U-tubes. Complete your next job faster and better using Blast-Pro[®] flex lances.

Duralife[®] Flex

Duralife[®] Flex was developed as an answer for limiting the abrasion and wear that is produced during the cleaning of tube bundles and pipes. Independent field tests have proven that Duralife[®] Flex lasts up to 40% longer than standard flex lances currently used. Duralife[®] Flex decreases downtime and replacement costs while increasing productivity. For your next project, ask for it by name: Duralife[®] Flex.

Maximus[®]

Maximus[®] is the first and only high efficiency Ultra High Pressure (UHP) hose. Maximus[®] works at pressures up to 50,000 psi and with a 1/4" inner diameter, it decreases costly pressure drop that smaller inner diameter conventional UHP hoses cause. Maximus[®] increases operating pressure at the nozzle for improved cleaning efficiency and reduces back pressure for less wear and fatigue on your entire pump system. **SPIR STAR** also offers a full line of Maximus[®] High Flow adapters to give you even more pump performance. With improved flow rates and more efficient cleaning, let Maximus[®] conquer your UHP flow problems.

Silver Mongoose[®]

The Silver Mongoose[®] is a lightweight, flexible hose that can take the punishment of today's harsh applications that normal rubber hose just can't handle. With a Super-Urethane outer cover, this hose meets the bill for rough service such as high pressure Line Moleing and Supply Hose. The Silver Mongoose[®] is available in sizes of 3/8" and 1/2" inner diameter and has a working pressure of 15,000 psi. It's ready to tackle the toughest job you have.
